## SECTION I

## INTRODUCTION

This volume contains an abstract of the data used most extensively in this research project. This data is an abstract in that monthly observations are condensed into quarterly averages. Not all the measures examined during the course of the work are included — only the 40 variables found to be most valuable in disclosing variations in the war over time and across provinces.

The time periods may seem unusual because the months included in each quarter are geared to the input of quarterly observations in the Hamlet Evaluation System. Portions of the data are incomplete because of changes to the reporting system over the 1967 through 1972 period. Some of the data is a direct aggregation of one or more data elements from the HES Question File (QHES) and Southeast Asia Province File (SEAPR). Other data elements have been modified to resolve discontinuities and provide estimates of missing data points. All these features of the data are documented in the following section on definitions and sources.

The listings are organized in two formats with the columns containing sequential quarters ending with an average in both. The first format gives all the observations of a variable for all provinces, the four military regions, province averages for the four war type categories, and the country-wide aggregation per two page list. The second format presents all 38 measures as observed in one of the 53 areas or aggregations of areas in a two page list. In both formats the data is scaled to provide at least three significant figures in the smallest, non-zero observation. Missing data is designated by blank columns or by a -0.000\* notation. Real "zeros" are designated by an 0.0 data entry.

---

\* During most computer analyses the -0.000 is a code used to exclude the missing cell. The real value of this code is  $-1.0 \times 10^{-25}$ , a very small negative number.

## SECTION II

## DEFINITIONS AND SOURCES

Friendly Strength and Activity

United States and Free World Military Forces Maneuver Battalion Strength — This is one of two measures of friendly regular ground force strength included in the data abstract. It is derived from the SEAPR data elements for the number of U.S. and third country maneuver battalions based in each province. An assumed value of 845 troops per battalion for U.S. and Korean units and 550 troops per battalion for other third country units was used to convert from battalions to strength data. Close study of the data will reveal that many provinces show all zeros even though U.S. or third country operations were carried out in these provinces. This is because the data input comes from unit basing rather than operation areas. The data tables are scaled in thousands. The code name used in the area listings is "US/FWSTX10E3."

ARVN and VNMC Maneuver Battalion Strength — This is the second measure of friendly regular ground force strength in this data set. It is derived from both the SEAPR data elements for the number of Army of the Republic of Vietnam and Vietnamese Marine Corps battalion headquarters locations and the System for Evaluating the Effectiveness of Republic of Vietnam Armed Forces (SEER) data elements for strength and operations. For the 1968 through 1970 data the SEER data was used to reflect assigned strength and actual deployment on operations. For 1967 and 1971-72 observations the average battalion strength for each province was used with the SEAPR battalion headquarters location data to derive strength estimates. Again the scale is thousands of troops. The code name used in the area listings is "AR/MCSTX10E3."

Regional Force Assigned Strength — This is one of two measures of South Vietnamese territorial strength. It is derived from the SEAPR data element for RF strength except for 1967 and late 1972. The 1967 values are extrapolations back from the 1968 to 1970 province strengths and trends. Data after June 1972 assumed no change except where heavy losses were obvious from attrition data elements. The scale factor in the listings gives the data in thousands of troops. The code name used in the area listing is "RFSTRX10E3."

Popular Forces Assigned Strength — This is the second measure of South Vietnamese territorial strength. As with RF strength, this data is a combination of direct extracts from the SEAPR File and estimates for 1967 and late 1972. Scaling places the table values in thousands of troops and the code name used in the area listings is "PFSTRX10E3."

Total National Police Strength -- This measure is the sum of the following three SEAPR data elements:

- National Police Field Forces Strength
- National Police Special Unit Strength
- National Police Other Strength

The scale factor used for the listings expresses this data in thousands. The listing code name is "POLICESTX10E3."

Peoples Self-Defence Force Participation — This measure is derived from the QHES File data on responses to question HQC6, "Do any hamlet households have a member or members actively participating in the PSDF?" An index scale of zero to four was constructed by weighting the responses as follows:

<u>Response</u>	<u>Value</u>
No, None	0
Yes, a few (less than 10%)	1
Yes, some (10-40%)	2
Yes, many (41-90%)	3
Yes, all or nearly all	4

The code name used in the listings by area is "PSDF PAR IDX."

U.S. Battalion Days — This measure is taken from the SEAPR File data on friendly operations. The data element indicates the equivalent number of battalion days of large unit operations per month. The scale factor used in the listings expresses the data in hundreds of battalion days. The code name used in the area listings is "USBNDAX10E2."

Total Battalion Days - This measure is the sum of the three SEAPR File data elements for U.S., third country, and South Vietnamese battalion days on large unit operations. It too is scaled in hundreds of battalion days per month in the listings with a code name of "TLBNDAX10E2."

U.S. Small Unit Operations with Contact - This is a measure of small unit activity taken from the SEAPR File operational report data. The large-small distinction is made on the basis of defining large unit activity as any operation involving three or more line companies under the command of a single headquarters for the operation. Anything less than that is small. The reason these distinctions were not carried into much of the analysis work stems from this definition equating a five man ambush with a two company sweep. It was decided that friendly KIA on friendly initiated action is a better measure of friendly initiative than any combination of large and small unit data elements. The nature of the war has been such that large operations tend to be only an aggregation of several small unit activities anyway. The data listings give the number of operations with contact per month with a code name of "US SOP W/CT."

Total Small Unit Operations with Contact - This measure is the sum of the three SEAPR File data elements for U.S., third country, and South Vietnamese small unit operations with contact. The listings express the data in operations per month with a code name of "TL SOP W/CT."

Close Air Support Sorties - This data is extracted from the Air Activities File (AIRSUM) using the aggregation of sorties flown by all services and countries classified as function 2 in the AIRSUM. Function 2 includes the mission codes of close air support and direct air support. The listings express the data in hundreds of sorties per month with a code name of "CASSOR X10E2."

Aerial Interdiction Sorties - This measure is also taken from the AIRSUM file data elements for all sorties categorized as function 1. Function 1 includes the mission codes of strike, flak suppression, air interdiction, and armed reconnaissance. The listings express the data in hundreds of sorties per month with a code name of "INTSOR X10E2."

#### Enemy Strength and Activity

Enemy Regular Strength - This measure represents the VC and NVA regular or main force maneuver battalion strength estimates. It was aggregated from the following SEAPR File data elements:

- NVA Maneuver Strength
- VC Maneuver Strength
- NVA Combat Support Strength
- VC Combat Support Strength

The observations for 1972 were adjusted to achieve totals at the VC military region or front level consistent with totals at this level of aggregation used by OASD(SA). The listings are scaled to show thousands of troops. The area listing code name used is "ENREGSTX10E3."

**Enemy Territorial Strength** — This measure represents the local component of enemy military strength. It was derived from the following SEAPR File data elements:

- VC Separate Company Strength
- VC Separate Platoon Strength
- Guerrilla Strength

Estimates for 1972 were modified as with enemy regular strength. The period February 1968 through July 1969 was missing for the guerrilla strength data element. Since checking separate company and platoon strength did not show the guerrillas were being covered in these categories due to some accounting change, estimates were computed to give a smooth transition from the January 1968 to August 1969 levels. The estimates are listed as thousands of troops with the code name "ENLCLSTX10E3."

**Enemy Ground Assaults** — This measure is the total number of enemy ground assaults per month. It is derived from the following SEAPR File data elements:

- Enemy Incidents of Assault Against Lines of Communication (IIA)
- Enemy Incidents of Assault Against Friendly Military Personnel and Facilities (IMA)
- Enemy Incidents of Assault Against Friendly Civilian Personnel and Facilities (ICA)

The listings give the number of incidents per month with a code name of "GD ASSAULT."

**Enemy Attacks by Fire** — This measure is the total number of enemy mortar, artillery, or rocket attacks involving 20 rounds or more per incident. It is the sum of the following SEAPR File data elements:

- Enemy Incidents of Attack by Fire Against Lines of Communication (ILF)
- Enemy Incidents of Attack by Fire Against Friendly Military Personnel and Facilities (IMF)
- Enemy Incidents of Attack by Fire Against Friendly Civilian Personnel and Facilities (ICF)

The data listed is the number of incidents per month with a code name of "ATK BY FIRE."

Enemy Harassment by Fire — This measure is the second, less severe component of enemy stand-off attacks involving less than 20 rounds per incident. It was constructed by aggregating the following SEAPR File data elements:

- Enemy Incidents of Harassment by Fire Against Lines of Communication (JLF)
- Enemy Incidents of Harassment by Fire Against Friendly Military Personnel and Facilities (JMF)
- Enemy Incidents of Harassment by Fire Against Friendly Civilian Personnel and Facilities (JCF)

The data is listed as the average number of incidents per month with a code name of "IRS BY FIRE."

Enemy Harassments Incidents — This measure includes minor enemy actions involving mines, booby traps, sabotage, etc. It comes from the sum of the following three SEAPR File data elements:

- Enemy Incidents of Harassment Against Lines of Communication (ILH)
- Enemy Incidents of Harassment Against Friendly Military Personnel and Facilities (IMH)
- Enemy Incidents of Harassment Against Friendly Civilian Personnel and Facilities (ICH)

The listings present this data as number of incidents per month with a code name of "HARASSMENT."

Enemy Political/Coercive Incidents — This measure includes the largely civilian oriented enemy actions such as public meetings, static displays, taxation, abduction, assassination, etc. It is the aggregation of the following SEAPR File data elements:

- Enemy Incidents of Coercion Against Friendly Personnel and Facilities (ICP)
- Enemy Incidents of Coercion Against Friendly Civilian Personnel and Facilities (ICC)
- Enemy Incidents of Coercion Against Lines of Communication (ILC)
- Enemy Incidents of Terror Against Lines of Communication (ILT)
- Enemy Incidents of Terror Against Civilian Personnel and Facilities (ICT)

The quarterly observations are listed as the average number of incidents per month using the code name "POL/COERCIVE."

Assaults Against Civilian/Line of Communication Targets — This measure is provided to separate civilians and lines of communication from friendly military personnel and facilities as targets of enemy high intensity activity. It is made up of the following two SEAPR File data elements:

- Enemy Incidents of Assault Against Friendly Civilian Personnel and Facilities (ICA)
- Enemy Incidents of Assault Against Lines of Communication (ILA)

The listings of this data are expressed as the average number of assaults per month with the code name of "ASLT CIV/LOC."

Terrorism Against Civilian/Line of Communication Targets — This measure is included as a contrast to the preceding measure. It consists of the two terrorism incident data elements used in the measure, enemy political/coercive incidents. It too, is listed as the average number of incidents per month. The code name used in the area listings is "TRSM CIV/LOC."

#### Friendly and Enemy Attrition

Total United States Combat Deaths — This measure is included to provide an indicator of U.S. combat involvement. It is the sum of the following four SEAPR File data elements:

- U.S. Army KIA
- U.S. Marine Corps KIA
- U.S. Air Force KIA
- U.S. Navy/Coast Guard KIA

The listings present the average monthly total U.S. KIA labeled, "US KIA."

Friendly KIA on Friendly Initiated Action — This measure is one component of total friendly combat deaths — categorized according to friendly and enemy initiated action. The friendly initiated component is the aggregate of the following SEAPR File friendly operation data elements:

- U.S. KIA on Large Unit Operations
- U.S. KIA on Small Unit Operations
- GVN KIA on Large Unit Operations
- GVN KIA on Small Unit Operations
- Third Country KIA on Large Unit Operations
- Third Country KIA on Small Unit Operations

The totals are listed as monthly averages per quarter with the code name "FRKIA, FRINIT."

Friendly KIA on Enemy Initiated Action — This measure is the second component of total friendly combat deaths. A check between the totals of this and the preceeding measure and total U.S. KIA reveals a number of discrepancies where the total U.S. KIA exceeds total friendly. This can be understood in the difference between basic data sources. Generally, U.S. KIA are very accurate counts from comptroller reports, but the other data elements come from reports initiated immediately following the action. While there are updates, and corrections to the operational reports, they apparently retain a certain amount of error and bias to overstate enemy losses and understate friendly KIA. The enemy initiated component of this measure is derived from the following SEAPR data elements:

- ARVN KIA Due to Enemy Assaults (KAA)
- ARVN KIA Due to Enemy Attacks by Fire (KAF)
- ARVN KIA Due to Harassment by Fire (HAF)
- ARVN KIA Due to Enemy Harassment (KAH)
- RF KIA Due to Enemy Assaults (KRA)
- RF KIA Due to Enemy Attacks by Fire (KRF)
- RF KIA Due to Harassment by Fire (HRF)
- RF KIA Due to Enemy Harassment (KRH)
- PF KIA Due to Enemy Assaults (KPA)
- PF KIA Due to Enemy Attacks by Fire (KPF)
- PF KIA Due to Harassment by Fire (HPF)
- PF KIA Due to Enemy Harassment (KPH)
- Other GVN KIA Due to Enemy Assaults (KOA)
- Other GVN KIA Due to Enemy Attacks by Fire (KOF)
- Other GVN KIA Due to Harassment by Fire (HOF)
- Other GVN KIA Due to Enemy Harassment (KOH)

- Unknown GVN KIA Due to Enemy Assaults (KXA)
- Unknown GVN KIA Due to Enemy Attacks by Fire (KXF)
- Unknown GVN KIA Due to Harassment by Fire (HXF)
- Unknown GVN KIA Due to Enemy Harassment (KXH)
- US KIA Due to Enemy Assaults (KUA)
- US KIA Due to Enemy Attacks by Fire (KUF)
- US KIA Due to Harassment by Fire (HUF)
- US KIA Due to Enemy Harassment (KUH)
- Third Country KIA Due to Enemy Assaults (K3A)
- Third Country KIA Due to Enemy Attacks by Fire (K3F)
- Third Country KIA Due to Harassment by Fire (H3F)
- Third Country KIA Due to Enemy Harassment (K3H)

Two data elements provided in the 1971 and 1972 updates to the Bendix SEAPR data base, US and GVN KIA due to anti-aircraft fire, are not included in this total measure to preserve continuity. The values in the listings are monthly averages labeled "FRKIA, ENINIT."

Total Enemy Combat Death - This measure was not used extensively in the analysis program, but is included in the abstract as a matter of substantive general interest. It is derived from the SEAPR File friendly operations and enemy incident data elements as follows:

- Enemy KIA on U.S. Large Unit Operations
- Enemy KIA on U.S. Small Unit Operations
- Enemy KIA on GVN Large Unit Operations
- Enemy KIA on GVN Small Unit Operations
- Enemy KIA on Third Country Large Unit Operations
- Enemy KIA on Third Country Small Unit Operations
- Enemy KIA During Enemy Assaults (KEA)
- Enemy KIA During Enemy Attacks by Fire (KEF)
- Enemy KIA During Enemy Harassment Incidents (KEH)
- Enemy KIA During Enemy Harassment by Fire (HEF)

Average monthly values in hundreds of enemy KIA are given in the listings with the code name "EN KIA X10E2."

#### Social-Economic-Administrative-Political Indices

Economic Strength Index - This measure is an average score for the responses to three HES questions weighted as follows:

- Is a variety of foodstuffs other than rice and nuoc mam (such as pork, vegetables, fruit, fish, etc.) for sale at the local market(s)?

<u>Response</u>	<u>Value</u>
No	0
Yes, limited quantity	2
Yes, ample quantities	4

- Are manufactured goods, such as bicycle tires, kerosene, and aluminum pots, for sale at the local market(s)?

<u>Response</u>	<u>Value</u>
No	0
Yes, limited quantities	2
Yes, ample quantities	4

- Is there a surplus of goods or foodstuffs produced in this village for sale outside the village?

<u>Response</u>	<u>Value</u>
No	0
Yes, but small	2
Yes, large	4

The index scores listed are monthly averages. Even though these are quarterly questions there are small month to month variations due to population movement, addition or deletion of hamlets, and other accounting type changes. The quarters were selected in order to match the input of quarterly responses to these questions as noted earlier. The code name used for this measure in the area listing is "ECON STR IDX."

Social Benefits Index -- This measure is an average score for the responses to nine HES questions weighted as follows:

- Can western medicines, particularly the more common antibiotics, be purchased locally by village residents?

<u>Response</u>	<u>Value</u>
No	0
Yes, but very limited supply	2
Yes, adequate supply	4

- Are GVN-approved medical services accessible to hamlet residents?

<u>Response</u>	<u>Value</u>
No, none accessible	0
Yes, but farther than a nearby hamlet	1
Yes, in a nearby hamlet	2
Yes, in this hamlet	4

- Is a GVN-accredited secondary school (grades 6-12) accessible?

<u>Response</u>	<u>Value</u>
No	0
Yes, but farther than an adjacent village	1
Yes, in an adjacent village	2
Yes, in this village	4

- Is a GVN-sponsored public health station (dispensary) accessible to residents of this village?

<u>Response</u>	<u>Value</u>
No	0
Yes, but farther than an adjacent village	1
Yes, in an adjacent village	2
Yes, in the village	4

- Is a GVN-sanctioned maternity clinic accessible to residents of this village?

<u>Response</u>	<u>Value</u>
No	0
Yes, but farther than an adjacent village	1
Yes, in an adjacent village	2
Yes, in the village	4

- Is a hospital (or private physician practicing western medicine) accessible to residents of this village?

<u>Response</u>	<u>Value</u>
No	0
Yes, but farther than an adjacent village	1
Yes, in an adjacent village	2
Yes, in the village	4

- Do any of the children of village residents attend secondary schools?

<u>Response</u>	<u>Value</u>
No	0
Yes, a few (less than 5% of school age children)	1
Yes, some (5-20%)	2
Yes, many (more than 20%)	4

- Do any of the children of this village complete the 5-year primary education program?

<u>Response</u>	<u>Value</u>
No, none	0
Yes, a few (less than 10%)	1
Yes, some (10-40%)	2
Yes, many 41-90%)	3
Yes, all or nearly all	4

- Are the children of hamlet residents able to attend primary school classes (grades 1-5)?

<u>Response</u>	<u>Value</u>
No	0
Yes, but school located farther than nearby hamlet	1
Yes, school located in nearby hamlet	2
Yes, school located in this hamlet	4

The index scores in the listings are monthly averages identified by the code name "SOC BEN IDX."

Administrative Presence Index — This measure is an average score for the responses to seven HES questions weighted as follows:

- Is there an active GVN Village Administrative Committee?

<u>Response</u>	<u>Value</u>
No	0
Yes, but consists of village chief only	1
Yes, but two or more positions are vacant	2
Yes, one position is vacant	3
Yes, all positions are filled	4

- Is the GVN village chief regularly present in this village?

<u>Response</u>	<u>Value</u>
No, except when accompanying operation	0
Yes, irregularly	1
Yes, regularly, but only by day	3
Yes, regularly day and night	4

- Is there a functioning GVN village office located in this village where official business is regularly conducted or where village administrative records are maintained?

<u>Response</u>	<u>Value</u>
No	0
Yes	3

- Are any hamlet households located in areas where GVN administrative personnel are unable to move about with relative freedom during daylight hours?

<u>Response</u>	<u>Value</u>
No, none	4
Yes, a few (less than 10%)	3
Yes, some (10-40%)	2
Yes, many (41-90%)	1
Yes, all or nearly all	0

- During daylight hours, do GVN authorities enforce the laws in this hamlet?

<u>Response</u>	<u>Value</u>
No	0
Yes, but marginal	2
Yes, adequate	4

- Is the GVN hamlet chief regularly present in this hamlet?

<u>Response</u>	<u>Value</u>
No	0
Yes, irregularly	1
Yes, regularly, but only by day	3
Yes, regularly day and night	4

- Does this hamlet have regular representation at Village Council meetings?

<u>Response</u>	<u>Value</u>
No	0
Yes	3

These index scores are listed as monthly averages and identified with the code name "ADM PRS IDX."

Economic Stimulation Index — This measure reflects rural development effort by the GVN and is the average score for the responses to four HES questions weighted as follows:

- Have any self-development projects in this village been retarded because of shortage of resources? (e.g., cement, roofing materials, fertilizer, seed, pumps, etc.)

<u>Response</u>	<u>Value</u>
No such projects	0
No, no retardation	4
Yes, minor retardation	3
Yes, serious retardation	2
Yes, resulting in project abandonment	0

- Were any needed village public works projects (e.g., roads, markets, wells, etc.) under construction in this village during the quarter?

<u>Response</u>	<u>Value</u>
No	0
Yes	3

- Do GVN technical personnel visit this village in support of local development programs? (e.g., agriculture technicians, animal husbandry specialists, fisheries specialists, etc.)

<u>Response</u>	<u>Value</u>
No	0
Yes, but infrequently (less than once a month)	1
Yes, periodically (1-3 times a month)	2
Yes, regularly (once a week or more)	3
Yes, resident in village	4

- Did any hamlet households have a member or members participating in GVN-sponsored economic improvement programs (agriculture, animal husbandry, fisheries, handicraft, etc.) during the past quarter?

<u>Response</u>	<u>Value</u>
No, no such programs	0
Yes, a few (less than 10%)	1
Yes, some (10-40%)	2
Yes, many (41-90%)	3
Yes, all or nearly all	4

The inclusion of self-development retardation makes sense in light of early descriptive work with the QHES File data. This work revealed this question doesn't say as much about retardation as it does about the presence of the programs. The scores in the listings are monthly averages with the code name being "ECON STIM-IDX."

GVN Political Influence Index — This measure of popular behavior and participation is constructed as the average score to 15 HES questions weighted as follows:

- Is there a GVN hamlet chief for this hamlet?

<u>Response</u>	<u>Value</u>
No	0
Yes, appointed	2
Yes, elected	3

- Do any hamlet households have a member or members active in the PSDF?

<u>Response</u>	<u>Value</u>
No, none	0
Yes, a few (less than 10%)	1
Yes, some (10-40%)	2
Yes, many (41-90%)	3
Yes, all or nearly all	4

- How active is the PSDF in this hamlet?

<u>Response</u>	<u>Value</u>
None organized	0
Organized, but inactive	0
Training and drills only	1
Organized nonmilitary activity only	2
Standing armed guard in the hamlet	3
Armed patrols and guard within the hamlet	4

- Do any hamlet households have a member or members working in GVN civil or military service?

<u>Response</u>	<u>Value</u>
No, none	0
Yes, a few (less than 10%)	1
Yes, some (10-40%)	2
Yes, many (41-90%)	3
Yes, all or nearly all	4

- Do any of the hamlet households have a member or members participating in "people's groups" organized by members of an RD Cadre team?

<u>Response</u>	<u>Value</u>
No, none	0
Yes, a few (less than 10%)	1
Yes, some (10-40%)	2
Yes, many (41-90%)	3
Yes, all or nearly all	4

- Did any hamlet households have a member or members who participated in self-development projects during the past quarter?

<u>Response</u>	<u>Value</u>
No, no such projects	0
Yes, a few (less than 10%)	1
Yes, some (10-40%)	2
Yes, many (41-90%)	3
Yes, all or nearly all	4

- Are the present members of the GVN village council elected to their posts by the people of this village?

<u>Response</u>	<u>Value</u>
No, no active village council exists	0
No, all village council members appointed	1
Yes, a few are elected (less than 30%)	1
Yes, some are elected (30-70%)	2
Yes, many are elected (more than 70%)	3
Yes, all elected	4

- Is the present GVN village chief elected by the village council?

<u>Response</u>	<u>Value</u>
No	0
Yes	3

- Does the GVN collect taxes in this village?

<u>Response</u>	<u>Value</u>
No	0
No, tax amnesty granted	Deleted
Yes, but unsystematically or sporadically	2
Yes, systematically	4

BSR 4033

- How frequently does the village council convene open public meetings to discuss development plans and projects, local grievances, aspirations, etc.?

<u>Response</u>	<u>Value</u>
Never	0
Less than once a month	1
Once a month on the average	3
Twice a month or more	4

- Is action taken on the village chief to investigate and correct local grievances and to satisfy local aspirations expressed at public meetings convened by the village council?

<u>Response</u>	<u>Value</u>
No, and no public meetings are convened	0
No, meetings but no action	1
Yes, occasional action	2
Yes, regular action	4

- Are any non-communist political parties active in this village?

<u>Response</u>	<u>Value</u>
No	0
Yes, one	1
Yes, two	2
Yes, more than two	4

- Are there any organized activities for the youth of this village (4T, Boy Scouts, sports, etc.)?

<u>Response</u>	<u>Value</u>
No	0
Yes	3

- Do the RD Cadre assigned to this village sleep in the village at night?

<u>Response</u>	<u>Value</u>
No, no RD Cadre	0
No	0
Yes, occasionally	2
Yes, regularly	3

- Were any new self-development projects selected by the people of this village during the quarter?

<u>Response</u>	<u>Value</u>
No	0
Yes, but none were selected at open meetings	2
Yes, some were selected at open public meetings	3
Yes, all were selected at open public meetings	4

The scores listed for this index measure are monthly averages identified by the code name "GVNPOLINFIDX" on the area listings.

VC Political Influence Index — This measure of popular behavior is the average score on seven HES questions weighted as follows:

BSR 4033

- Which of the following most closely reflects the activity of the village level VC infrastructure in the village?

<u>Response</u>	<u>Value</u>
No known or suspected infrastructure	0
Sporadic covert activity, little or no overt activity	1
Regular covert activity, sporadic overt activity	2
Regular overt activity, but not firmly established	3
Unchallenged authority in the village	4

- Do enemy forces tax goods and produce moving to or from this village?

<u>Response</u>	<u>Value</u>
No	0
Yes, sporadically	2
Yes, regularly	4

- Do enemy forces physically control this hamlet?

<u>Response</u>	<u>Value</u>
No	0
Yes	2
Yes, defensive works have been by enemy forces to establish a "combat hamlet"	4

- Which of the following most closely reflects the status of the enemy infrastructure in this hamlet?

<u>Response</u>	<u>Value</u>
No known or suspected infrastructure	0
Sporadic covert activity, little or no overt activity	1
Regular covert activity, sporadic overt activity generally at night	2
The primary authority in the hamlet at night, but most operate covertly in the day	3
The primary authority present day and night	4

- Does the enemy collect taxes from hamlet households (in cash or in kind)?

<u>Response</u>	<u>Value</u>
No	0
Yes, sporadically	2
Yes, regularly and systematically	4

- Do any hamlet households have a member or members who participated, by coercion or otherwise, in enemy-organized non-military group activities (public meetings, demonstrations, work gangs, etc.) during the past quarter?

<u>Response</u>	<u>Value</u>
No, none	0
Yes, a few (less than 10%)	1
Yes, some (10-40%)	2
Yes, many (41-90%)	3
Yes, all or nearly all	4

- Do any hamlet households have a member or members in enemy service?

<u>Response</u>	<u>Value</u>
No, none	0
Yes, a few (less than 10%)	1
Yes, some (10-40%)	2
Yes, many (41-90%)	3
Yes, all or nearly all	4

The monthly average scores listed for this index are labeled "VCPOLINFIDX."

GVN Controlled Rural Population — This measure is taken from the SEAPR File data element giving the population living in hamlets rated as being under GVN control according to the Vietnam Special Studies Group (VSSG) model. This model is more sensitive to changes in military presence than either the HES security or pacification models. The data listings are population in hundred-thousands. The area listings identify this score with the code name "GVNCNTLX10E5."

#### Miscellaneous Ratios and Indices

Rural Population — This is a measure of province size taken from the HES data included in the SEAPR File. It has been adjusted to eliminate discontinuity due to changes in the HES, accounting changes, or errors as described in Volume II of this report. The preceding GVN control scores were similarly adjusted to enable computation of the percent of rural population under GVN control without finding occasional nonsense. The data listings are population in hundred-thousands with the code name "RURPOPX10E5."

Friendly Territorial Strength per GVN Controlled Population — This measure is a ratio indexing the number of RF and PF troops per population under GVN control. If the primary mission of the RF and PF is assumed to be protection of the population, the number of troops per capita needed to do the job is a useful piece of information. In the data listings this index is expressed in terms of troops per 10 people under GVN control. The code name used in an area listing is "RF+PF/GVNC."

Friendly Regular Strength per Contested Population — This measure is a parallel to the previous measure to consider the GVN control expansion role of the ARVN/VNMC. Any regularity between this index and achievement would also be useful information. The denominator is derived from the difference between total rural population and the segments of that population under either GVN or VC control according to the VSSG model. Contested may be a misleading term because all the population could be said to be contested in a very real sense. However, that portion not under the control of either side does represent the source of most gains by both sides. The index values are listed as troops per 10 people in the contested rural hamlets. There are a few very large scores where the contested population has been very small. Any analysis using this data should be careful to screen these cases out. The code name used in area listings is "REG/CONTEST."

Overall Force Ratio — This measure is a bit redundant because all the elements are already in the data set. Still enough has been published in the popular wisdom concerning counterinsurgency to make examination of the Vietnam province level force ratios a little easier to study and use. The listings present the ratio of total friendly to total enemy combat strengths with the natural code name "FORCE RATIO."

Regular and Territorial Dimensions — These measures are the partitioning parameters derived from the two dimensional solution to variance across provinces. The listings give factor loadings for each area with the code names "REGDIM" and "TER DIM."

Two more miscellaneous measures are valuable as analysis tools for construction of new indices to compensate for province size. These are area in square kilometers, and the percent of that area being essentially unpopulated. The values for these "constants" are:

<u>Province</u>	<u>Area</u>	<u>% Unpopulated</u>	<u>Province</u>	<u>Area</u>	<u>% Unpopulated</u>
Quang Tri	4,913	87.7	Binh Tuy	3,792	94.6

## SECTION III

## LISTINGS BY VARIABLE

The format of the following 76 pages of tables is relatively straight forward. Each of the 38 measures is presented on two pages. The first page contains 12 data columns for the quarter ending in February 1967 through the quarter ending in November 1969. The second page continues the quarterly listings in the columns through the quarter ending in August 1972. The final column on this page is over-all mean values. The rows are the 44 provinces, four military regions, four war types, and the country-wide values. The province data is partitioned into war types as follows:

## Regular Dimension —

Low Regular if loading is less than -0.5

High Regular if loading is greater than 0.5

## Territorial Dimension —

High Territorial if loading is greater than 0.5

Low Territorial if loading is less than -0.5

If a province has loadings meeting the criteria for both dimensions, it is placed in the category for which the absolute value of the loading is greatest. The regular-territorial dichotomy breaks down in 1972 when no provinces have loadings greater than  $\pm 0.5$  in the last quarter. There are also no low regular provinces in the quarter ending in February 1972.

SECTION IV

LISTINGS BY AREA AGGREGATION

(U) The following 106 pages present listings of the same data given in Section III. Here each two pages have all the observations for all variables for one of the 44 provinces, four military regions, four war types, or the country wide aggregate. In these listings the rows are variables instead of areas.
